

C11 - 4.2 - Find Equation in Standard Form HW

Find equation in Standard Form

$$x - int = 1 \text{ and } 5$$
$$a = 1$$

$$x - int = 1 \text{ and } 5$$
$$(3, -8)$$

$$x - int = -3 \text{ and } 1$$
$$a = 2$$

$$x - int = 2 \text{ and } 4$$
$$a = \frac{1}{2}$$

$$x - int = 2 \text{ and } 4$$
$$(0, 4)$$

Factored form, with fractions

$$x - int = \frac{1}{2} \text{ and } \frac{9}{2}$$

Standard form, no fractions

$$x - int = \frac{1}{2} \text{ and } \frac{9}{2}$$
