

$h > 16$  m d?

10)

$$h = -2d^2 + 8d + 10$$

$$-2d^2 + 8d + 10 > 16$$

$$-2d^2 + 8d - 6 > 0$$

$$\frac{-2(d^2 - 4d + 3)}{-2} > \frac{0}{-2}$$

$$(5, 0) \quad d^2 - 4d + 3 < 0$$

$$(d - 3)(d - 1) < 0$$

$$1 < d < 3$$
