

# P12 - 2.10 - Projectile Motion Cliff Angle Notes

A ball is shot off a 60m cliff at  $40 \frac{m}{s}$  at an angle of  $50^\circ$  from the horizontal. What is its max height? What is its time in flight? What is the horizontal distance the ball travels? What is the velocity and angle at impact?

**Up/Over**

$v_f^2 = v_i^2 + 2ad$   
 $d = \frac{-v_i^2}{2a}$   
 $d = \frac{-(30.6)^2}{2(-9.8)}$   
 $d = 47.8m$

**Up**

**Add Cliff**

Max height =  $47.8 + 60$   
 $= 107.8m$

$v_f = v_i + at$   
 $t = \frac{-v_i}{a}$   
 $t = \frac{-30.6}{-9.8}$   
 $t = 3.1s$

Time to Max Height = 3.1s

$\Delta d = v_i t + \frac{1}{2} at^2$   
 $t = \sqrt{\frac{2d}{a}}$   
 $t = \sqrt{\frac{2(-107.8)}{-9.8}}$   
 $t = 4.69s$

$v_f^2 = (0)^2 + 2a\Delta d$   
 $v_f = \sqrt{2(-9.8)(-107.8)}$   
 $v_f = 45.96 \frac{m}{s}$

**Add Times**

$t = 4.69 + 3.1$   
 $t = 7.8s$

Total time in flight:

**Or**

$\Delta d = v_i t + \frac{1}{2} at^2$   
 $-60 = 30.6t + \frac{1}{2}(-9.8)t^2$   
 $0 = -4.9t^2 + 30.6t + 60$

$t = 7.8s$  Quadform

**Up/Down**

**Over**

$v = \frac{d}{t}$   
 $d = vt$   
 $d = 25.7(7.8)$   
 $d = 200.5m$
